Introducing The Brainbox

The Solution for a Complete Suite of Managed Services in One Smart Appliance

The WiredIQ BrainBox brings the redundancy and cost savings of SD-WAN together with a fully PCI and HIPAA compliant security device, delivering unified communications and the Internet of Things in one intelligent appliance. WiredIQ provided primary and secondary managed bandwidth at your location comes with a guaranteed SLA uptime of 99.999%.

Product Specifications

- CPU: 9th Gen Intel Core i7
- RAM: 16Gb
- Disk: 4Tb
- Network - SD-WAN Ports: 3 Intel Gigabit, LAN Ports: 5 Intel Gigabit
- Onboard I/O Connectors: PCI Express 2.0 x4 Side-port, 4 x USB 3.0, 4 x USB 2.0, Full-size mini-PCIE Slot, SIM Card Socket, HDMI Header (cable incl), Intel TPM 2.0 Trusted Computing, 10-pin GPIO Header, Chassis Intrusion Jumper, SATA3 6Gb/s Connectors, RS232 Port
- Power Supply: 200 Watts
- Watchdog Timer

Remote Management Bundle

Remote Monitoring and Management

Keeping a business network running smoothly with no down time currently takes a team effort. With multiple vendors providing services makes it hard for a customer to know who to call or what the problem is. That is where WiredIQ comes in, the BrainBox monitors devices connected to it and alerts techs when there is a problem 24/7/365 days.

Audits and reports are running non-stop to ensure your network is running at peak performance. Our WiredIQ Specialist review those reports daily monitoring The BrainBox, SD-WAN traffic, Network Security, BrainWave Access Points, Security Cameras, Door Access Controls and Burglar Devices.

If any one of those devices stops working a trouble alert is sent out and a Specialist starts the repair, most of the time before anyone on the network notices a problem.

WiredIQ can set up Remote Management features for the customers IT manager or contracted IT manager. They will receive alerts and able to log into the portal and see real time status

The WiredIQ Mid-Brain LTE

It may be smaller in size, but not in security.

The WiredIQ Mid-Brain brings the redundancy not only for your primary internet connections, but also for the Brainbox itself. This provides your business the extra reliability it needs for business-critical functions. WiredIQ provided primary and secondary managed bandwidth at your location comes with a guaranteed SLA uptime of 99.999%.

Product Specification

- Chipset: MT7620A
- RAM: DDR2 128MB
- SPI FLASH: 16M
- 4G: Module MC7354
- 4 Antennas: 2 5dBi Wi-Fi and 2 4G
- Interfaces: 1 PCI-E slot, 1 SIM card slot, 1 USB 2.0 port, 1 Micro SD card slot, 1 10/100M WAN port(Auto MDI/MDIX), 4 10/100M LAN port(Auto MDI/MDIX)
- Max Power Consumption: < 12 Watts
- Certifications: FCC & CE

WiredIQ's SD-WAN / SD-LAN

This SD-WAN product is like no other!

WiredIQ offers a complete SD-WAN Solution, with three gig inputs allowing load balancing between three completely different internet providers. The BrainBox monitors the connections in real time routing all the data traffic appropriately. If one internet connection fails data traffic is routed over to the secondary connections. The BrainBox alerts our monitoring center of the down circuit, and a tech will start working on the problem. If the customer only has one internet connection, then WiredIQ's LTE Mid-Brain can take over and keep all the mission critical programs working.

Built-in Security

- 256 Bit NIST Certified Military Grade Encryption
- PCI/HIPAA Compliant Security
- Firewall
- Intrusion Detection / Protection System
- Content Filter
- Monitored with 24 x 7 x 365 Support

Extended Cloud Infrastructure

- Cloud Applications
- Cloud Servers
- Cloud Desktops
- Cloud Storage
- Cloud Backup

Multi-WAN:

- Load Balance or Failover
- Private and Public WAN Support
- Premise and Cloud Concentrators
- Secure, Geographically Distributed Redundant Cloud WAN access

Application Specific SD-WAN Optimization:

- Application Priority Ranking
- Packet Acceleration
- Packet Prioritization
- Error Correction
- Rules/Limits

The BrainBox Network Security Bundle

Cyber Security You Can Trust

WiredIQ's Firewall/Router Services monitors for problems or issues on all external and internal data traffic. The BrainBox is continuously maintained and supported with anti-virus updates to keep up growing threats.

WiredIQ's Intrusion Detection & Prevention stops any malicious intruders from accessing devices or corrupting software. WiredIQ subscribes to the main services to keep updates current as part of the service.

WiredIQ's Content Filtering blocks users from accessing web sites that are infected with malware or web sites not appropriate for company use. This is continuously updated with subscriptions from Cisco Systems.

PCI Compliance

Payment Card Industry (PCI) Compliance has 12 requirements that are updated on a regular basis. WiredIQ's Network Security Bundle keeps up with the changes and updates the BrainBox

HIPAA Compliance

The Health Insurance Portability and Accountability Act (HIPAA) is a federal law that required the creation of national standards to protect sensitive patient health information from being disclosed without the patient's consent or knowledge.

The Power of the BrainBox!

The WiredIQ Brainwave

WiredIQ's Access Point Solution!

In today's connected world, people expect seamless connectivity to their networks and the Internet. That's why WiredIQ Access Points offer expanded range and coverage areas that make them a fast, transparent extension of your wired network.

With WiredIQ® Wi-Fi access points, employees can securely access network resources from places that were previously out of range. Standards-based encryption protocols keep WiredIQ wireless access points just as secure as a wired network, to help ensure that critical business data stays safe. Couple that with easy-to-use web-based configuration tools, and you have a highly secure wireless extension to your network that you can set up and deploy without the need for an IT staff. And as your business grows, they're even easier to manage. Simply put, WiredIQ wireless access points are an important piece of the networking foundation your business needs to keep pace in today's dynamic environment.

Full Phone Suite Cloud Based or Hybrid

The Hardware Options Necessary for You to Customize Your Business IP Phone Systems.

WiredIQ offers a fully seamless Cloud Based Phone Solution or a Hybrid Solution combining on premise Phone System with Cloud Based Phone System. This allows businesses the option of using the features of the Cloud for back-up redundancy while retaining the features an on-prem system offers. The Hybrid Solution is great for hotels, assisted living centers and hospitals that have a large number of standard analog phones, as they don't have to pay for seat pricing. A tremendous monthly savings for customers who have switched to WiredIQ. Features Include:

- Analog Device Support
- Directory, dial by name or Extension
- Call Transfer
- Flexible Call Routing
- Flexible Dial Plans
- Fax2Email
- Fax via HTTP
- Personal & Mobile Faxing
- Instant Messaging
- Multi-layer Cloud Auto Attendant
- Presence Management
- Reporting & Analytics
- Softphone & Home Office Extensions
- Video Conferencing
- Web-Based User Administration
- HIPPA/PCI Compliance
- Custom Music / Message On Hold (MOH)
- Unicast Paging & Group Paging
- HD Voice Call Clarity
- Enhanced CallerID
- Unlimited Voicemail
- Voicemail Groups
- Voicemail-To-Email
- Line Pooling & Bursting
- SIP Trunks
- Cloud-based Call Recording & Encryption
- Call Transfer, Park, Intercom, & Paging
- Find-Me / Follow-Me Call Forwarding
- Inbound Intelligent Call Queuing
- Time-Based Call Routing
- Unlimited Conference Calling
- Zero Touch Phone Provisioning

The Power of the BrainBox!

Managed Video Surveillance Cameras

Camera Solutions Customized for Your Business Needs !

Security requirements and application settings vary. That's why WiredIQ designs and tailors network cameras to meet various needs, from general video monitoring to video content analytics with deep learning algorithms and beyond.

By rendering high-quality images across a range of lighting conditions, minimizing storage and bandwidth requirements and providing data-powered situational awareness, WiredIQ network cameras can help users make smart decisions. Our network cameras are the ideal choice for hundreds of application scenarios.

Deploy the Internet of Things and gain access to modernized premise security. The WiredIQ BrainBox makes recording and storing video data easy, while providing clear and informative footage to better protect your business location. Choose how you want to store your backup video footage, whether all footage is recorded and stored, or certain events occur that trigger recording to begin on a specific camera at certain times of the day. Monitoring live footage is easy, whether you are an on-site monitor, or viewing from a mobile device.

Alarm Systems and Access Controls

The BrainBox® Modernizes Your Burglar Alarm System!

Deploy the Internet of Things and gain access to modernized alarm management. Premise Security is backed up with a built in AT&T wireless connection. If your internet connection is cut, the alarm still works. Save money by eliminating the monthly cost of the old alarm phone line that you no longer need.

The BrainBox® Enhances Your Building's Access Control

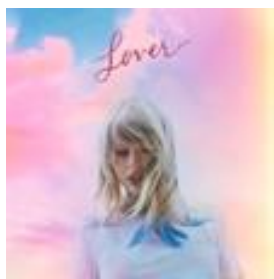

Deploy the Internet of Things and gain access to modernized building access control through the use of RFID scanners and card readers. Your premise security is backed up with a built in AT&T wireless connection. If your primary internet connection is lost, your building control is protected.

Streaming Music

Managed
Music

40+ Million fully licensed songs and advanced, practical features.

Here at WiredIQ, we know that the key element your customers are looking for is great music. With WiredIQ, your business will have access to an extensive music library; professionally curated soundtracks and smart tools to achieve great music. WiredIQ will add value to any size and type of business that plays music for their customers.

I.T. Managed Services

The BrainBox® can also facilitate the Management of all your IT assets

The BrainBox provides centrally managed Anti-Virus, Anti-Spam, Anti-Malware and personal Firewall subscriptions for your servers, Macs and PCs. Your servers and other network assets can also be monitored and managed with **Remote Monitoring and Management Agents (RMM)**. RMM provides managing software version control, license and asset management. The BrainBox also provides Backup, Business Continuity and a complete Network Security Bundle which includes PCI and HIPPA Compliances.

Backup and Business Continuity!

We provide complete business continuity. This includes everything from backing up your servers and PCs to backing up the processing with automatic failover. Having business continuity with automatic failover, backup, restoration, and voice is critical to your survival and WiredIQ will put it all together for you.
